Professional Profile

Data Analyst with nearly 3 years of professional experience in Power BI dashboard development, SQL-based data preparation, and business reporting. Experienced in data modelling, KPI reporting, and cross-functional collaboration with IT and operations teams. Background in DWDM transport network operations. Currently pursuing Master of Engineering in Information Technology in Germany.

TECHNICAL SKILLS

Analytics & BI: Power BI, SQL Server, Excel

Programming: Python, C, C++, DSA, OOPS, Generative AI

IT & Tools: Git, Wireshark, ServiceNow, Windows Server, Active Directory, Linux

Networking: DWDM Transport Network, Networking Fundamentals

WORK EXPERIENCE

Infosys, Senior System Engineer,

12/2022 – 09/2025 | India

- Developed and maintained interactive Power BI dashboards to support business and operational reporting, reducing manual reporting efforts and improving visibility for stakeholders.
 - Executed SQL queries and data extraction from SQL Server to prepare datasets for analytics, ensuring accuracy and consistency across reports.
 - Cleaned, transformed and validated data for business-critical dashboards, improving reliability of insights for management decisions.
 - Collaborated with IT and operations teams to define reporting requirements and deliver data solutions aligning with KPIs and performance metrics.
 - Supported DWDM network operations by monitoring and troubleshooting data transport performance, contributing to high-availability network operations.
 - Utilised ServiceNow for tracking tickets and coordinating with relevant teams to resolve data-related issues and enhance reporting workflows.
-

Projects

Language-Dependent Similarity Investigation – (Ongoing)

- Building a modular .NET (C#) framework to evaluate language-agnostic performance of modern embedding models through cross-lingual similarity and retrieval experiments, including language-swap stress tests, bias diagnostics, threshold calibration, reproducible reporting, and baseline comparisons.
- **Tools and Technologies:** .NET, C#, GenAI, Machine Learning.

Sales Performance Dashboard – Power BI / Excel

- Built an interactive Power BI dashboard to track revenue, profit, and product performance across regions, with data cleaning and transformation using Excel/SQL.
- Developed KPIs and visualizations (trend analysis, top products, regional performance) to deliver actionable insights and support data-driven sales decision.

EDUCATION

M.Eng. in Information Technology

Frankfurt University of Applied Sciences
10/2025 – Present | Frankfurt, Germany

B.Eng. in Electronics Engineering

Vivekanand Education Society's Institute of Technology
08/2019 – 07/2022 | India

Diploma in Industrial Electronics

Fr. Agnel Polytechnic
7/2016 – 08/2019 | India

CERTIFICATIONS

- Python Programming – (Getting Started with Python)
- Generative AI for Beginners
- Windows Server & Active Directory – Infosys
- Power BI Certificate
